SPORTSMEN SUPPLIES

**FORT SASKATCHEWAN,  
ALBERTA, CANADA**

# SUBMARINE TRAPS FOR BEAVER, MINK AND MUSKRATS

From left to right: (1) The Beaver Trap. (2) The Submarine Trap, used to trap Muskrat and Mink. (3) Torpedo Muskrat Trap, now undergoing tests, will soon be on the market. (4) Live Muskrat Trap.

Submarine Traps are made to catch Mink, Muskrat, Beaver and Otter, and are one of the greatest humane traps at present. All animals drown one minute after entering the trap.

The Submarine Tank Trap is designed for live trapping of Muskrats, to enable for farmers to restock their farms.

Submarine Traps were invented and patented by a trapper with 25 years experience in trapping fur bearing animals. They have been tried and tested for five years by experienced trappers. They are so easy to set that any new trapper can operate them

A Large Male Mink Caught by a Submarine Muskrat Trap.

\$180.00 Worth of Muskrats Caught in 48 Hours with a Submarine Trap.

as well as one that is experienced, and so simple they can be set at night in any depth of water, or under the ice after freeze up without the aid of a light.

Submarine Traps are built to catch and hold ten muskrats at one time, and can be left set for two or three days without having to be visited by the trapper. Muskrats will drown in one minute after entering the trap.

There are only three parts to a Submarine Trap. No doors or springs to go out of order, and no bait necessary. They are built round, and all that is required is to drop them in the water and they will roll to the deepest part of the entrance to the runs or houses. No matter which way they stop, the trap entrances are always in the correct position for the catch.

A Submarine Trap is so simple to set that a twelve year old girl caught a Muskrat and Mink in one night.

The muskrats will enter the trap as they pass to and from their feeding grounds and once in they cannot escape.

These traps can be set in any depth of water but they must be at least two inches below the surface so that the animals cannot breathe.

There is no loss of pelts due to biting or their feet being pulled off as in ordinary steel traps. One Submarine Trap will catch more muskrats in a season than fifty steel traps and require one-tenth less walking to visit them. It shortens the catching of muskrats in a lake or slough from weeks to a few hours, making it possible for a trapper to cover a greater area in one season. As the traps automatically rest in the right position, due to their shape no stakes or stones are required to hold them in place, and trap thieves or other trappers cannot see where they have been set.

We suggest 3 to 5 traps for a catch of 50 to 250 muskrats in a season and 10 to 15 traps for a catch of 250 to 1,000 muskrats. Full instructions are enclosed how to set and operate them.

They are ten inches wide, two feet long and made of galvanized fox wire and steel and with a small amount of care will last from ten to fifteen years.

Submarine Traps are designed to catch muskrats, but trappers are now using them for mink with excellent results. Many trappers report catching mink with only two complete feet, being caught in steel traps on several occasions before.

To catch mink, place the trap under water along the banks where mink travel and put a fish or other bait inside the trap to attract the mink. Another system used for mink trapping is by placing the trap in entrances to muskrat runs or houses, the mink coming to kill the muskrats will be caught.

The price of a Submarine Muskrat and Mink Trap is \$4.50 express prepaid to any part of Canada in which points are served by railroad. To points served by air express we properly express charges to the end of the railroad only.

For the fur farmer who wishes to restock his muskrat ranch or select surplus males from his original stock, we recommend the Submarine Tank Trap. He can catch all his muskrats alive and choose which ones he desires for pelting.

The Submarine Tank Trap will catch from 15 to 20 muskrats at one time. All muskrats are dropped below the water line by a swivel door where no draft can chill them and cause death. These traps, made of galvanized steel, are water tight, will last for years and can be set in any depth of water by using a wood float.

They can be also set in very shallow water as the bottom of the traps being of a V shape, can be pushed down into the mud by a trapper's own weight. Two small stakes are then pushed

The Submarine Tank Trap is used only for catching Live Muskrats, and cost \$19.00 F.O.B. Shipping Point.

into the mud at opposite corners to hold them in position.

Place a piece of carrot or sweet apple on the bait holder, and every muskrat that comes along to investigate will crawl onto it and fall through the swivel door below. The door then closes and comes into position for another muskrat.

Submarine Tank Traps are twenty seven inches in height, eighteen inches in width and five inches thick, weighing approximately nine pounds each, and are so constructed that a trapper can carry three at one time.

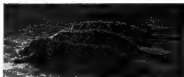

We have reports of 22 live muskrats being caught at one time, and in a 24-hour period 20 muskrats have been caught.

**FOR TRAPPERS CATCHING BEAVERS and OTTERS** we manufacture the Submarine Beaver and Otter Trap. It is the same type as the Submarine Muskrat Trap but built of much heavier material, and is two feet wide and four feet long.

By placing one of these traps in the entrance to a beaver run or house the otter, which kills beaver, will be caught. Beaver or otter entering the trap will drown in a few minutes.

These traps are used for pelting purposes only. Full instructions on how to set and operate traps are enclosed with each order.

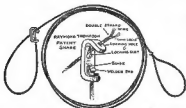

Many trappers use the beaver trap when set in use, on trap line for catching fish. One of these traps placed in small creeks will catch and hold, in the summer months, a large amount of fish.

4 Beaver caught at one setting, with one of these traps. A trap will hold 5 or more Beaver.

The cost of the trap is \$12.00 F.O.B. Shipping Point.

## Thompson Steel Snares

Snare solves many problems that have bothered the amateur and professional trapper alike. It will snare any animal from rabbits to the biggest game. When set for wolves it is NOT disturbed by small game or birds such as "Whiskey Jacks", magpies and other pests such as squirrels, owls, hawks, etc.

- |                                                          |                                  |
|----------------------------------------------------------|----------------------------------|
| No. 0—For Mink, Muskrat, Rabbit, Skunk and similar,      | Price each 25c; Dozen \$2.50     |
| No. 1—For Fox, Raccoon, Wildcat,                         | Price each 40c; Dozen \$4.50     |
| No. 2—For Badger, Beaver, Lynx and similar size animals, | Price each 50c; Dozen \$5.00     |
| No. 3—Special Coyote (Brush wolf) snare,                 | Price each 60c; Dozen \$5.80     |
| No. 4—Cougar or Mountain Lion and Black Bear,            | Price each \$1.10; Dozen \$12.00 |
| No. 5—Timber Wolf and large Bears, etc.,                 | Price each \$1.75; Dozen \$18.00 |

All prices postpaid to points served by ordinary mail. Circulars giving setting instructions and showing how to set snares will be sent with each order.

Invented, Patented and Manufactured by Raymond Thompson, internationally known authority on furs and trapping.

The Thompson Snare was developed in the Canadian northwest and used there since 1925. Professional trappers use them by the hundreds as they are light in weight, easy to carry and a dozen snares can be carried as readily as a single trap.

Frostproof, Snowproof, and Rainproof, equally effective on land or in water, the Thompson

WE ARE AGENTS FOR

## Hawbaker's Lures

AND RECOMMEND THEIR USE TO INCREASE FUR CATCHES

### FOX GLAND LURE NO. 100

This gland Lure is made from all No. 1 fox parts mostly taken from females while in heat. Not common this gland lure like found at other markets. The ingredient used for base holds the odor for days after being placed at the set. This Gland Lure will make a fox come right up into a hound dog's face and fight to get to it. Trappers report this the finest lure ever used. It's worth \$10.00 per oz. Nothing better. Directions with order.

### HAWBAKER'S NO. 200 FOX LURE

My 200 fox Lure has won the confidence of thousands of Fox Trappers. It improves with age and the 200 Lure I offer this season is aged and will really call a fox. It's a combination Lure causing a fox to investigate whether hungry, out of curiosity, passion, etc. Creates sexual excitement. It's a real strong lure and will attract fox at least 1/4 mile or better when wind is in favor of the set. Include this lure in your order.

### HAWBAKER'S NEW LONG DISTANCE CALL LURE FOR FOX AND COYOTE

Entirely New. NOTHING LIKE IT for sale anywhere. It will call the wild canine family for as much as up to 1 mile if wind is right. NOT TO BE USED AT SETS BUT USED IN CONNECTION WITH OTHER TYPES OF LURES and to be placed on a wood or bush at least 30 ft. to 90 ft. from the set. It's to call animals long distances and my other types of lure should be used directly at set. Contains Skunk Musk and cannot successfully be used where skunk are plentiful as it is also a great skunk caller and it may give you quite a bit of trouble with catching Skunk in your Fox and Coyote sets. But where Skunk are not too plentiful, you will never be without Long Distance Call after you have once used it. Really at the price of Skunk today one cannot go wrong by using it for Skunk alone. In northern states when Skunks are denuded up you will find Long Distance Call the real lure. Any Gland or food lure will not attract for long distances, and Long Distance should be used in connection with any gland or food lure but not close to the set. Just close enough to call the fox or coyote so they can locate the other lure at the set.

### COYOTE AND WOLF GLAND LURE NO. 100 ALL SEASON TRAPPING LURE

The Natural Coyote and Wolf Lure, made from hot Canadian Wolf and Western Coyote parts and glands. All No. 1 parts and glands. I use very little Urine in my lure and add just the right amount of good heavy base to make it lasting and throw off its odor in any kind of weather. No better coyote lure regardless of price or claims. Western Trappers agree that I made my Matrix lure different from any other trappers. It will make any Coyote slobber and scratch when he gets a whiff of it. Worth \$10 per oz. of any wolfers' money. In Amber colored bottles and sealed so no foreign odors can get to it.

### COYOTE SPECIAL NO. 200

Similar to my Fox 200, but different ingredients that are more attractive to western furbarers. Contain passion ingredients same as Fox 200 but ether food and one ingredient are different. Creates sexual excitement. Has a powerful odor that will reach out a long ways and call plenty of coyote. Every coyote trapper should have a bottle. Good for all seasons but especially adapted for fall and early winter trapping. It's an aged and preserved lure and will hold its same odor regardless of age.

### HAWBAKER'S NEW COYOTE FOOD LURE NO. 400

This is a new aged food lure with an odor that is very appealing to the Coyote. A coyote will risk his hide to get to this new food lure. Not a foul rotten odor but real coyote food lure. Aged just right. Made from only one ingredient known to but few trappers in America. Once you have used this lure you will send many repeat orders.

### HAWBAKER'S OLD STANDBY MINK LURES

Hawbaker's Mink Lure No. 1.—Trappers all agree that only a few odors will attract Mink. From the many years I spent on the trap-line I know this is to be very

lure. Mink will take to only a few baits. Trout being the main one. Only a few lures will attract them. I have the best lure for mink in the world and this is a very broad statement. Letters here in my files prove that actually 31 mink have been taken on one oz. of my Mink Lure. Another where 22 were taken on one oz. Another, where it has taken old trap-why two and three legged mink in the dead of winter when the weather was 20 below zero. Where would you even find a mink lure that would attract at least a few mink. I know this is the only really attractive mink lure being offered anywhere. Thousands of mink have been reported trapped with it.

I use gallons of mink musk in compounding this lure, this with other secret ingredients carefully blended make it a lure that any mink will notice at any time of the year. This lure contains the original secret anti-frost preservative base used in all Hawbaker's Lures and it will throw off odors and stay at a set for days even in weather 20 to 40 below zero.

It's no food lure but a natural mink caller. Mink trappers will find this the best lure they have ever used.

Hawbaker's No. 2 Mink Lure—Contains same ingredients as No. 1 lure with one additional ingredient added. Will take as many minks as No. 1 lure and recommended for trapping mink that have been plucked in traps where my No. 1 lure was used.

#### HAWBAKER'S WEASEL LURE

At the present prices of weasel you will want to increase your catch and you can be sure Hawbaker's Weasel lure will do it. Made nearly same as my famous mink lure only weasel musk is used. Also contains Rabbit gall, a natural weasel caller. Good for fall and winter trapping.

#### HAWBAKER'S WILD CAT LURE NO. 1

Made from aged wild cat glands that are four years old. Only the finest glands are used for this lure. Contains other Cat calling ingredients. No Oil catnip, so can be used freely in Porcupine country without them molesting your sets. Has hundreds of cats to its credit. Will also call mountain lions, lynx.

#### HAWBAKER'S WILD CAT LURE NO. 2

Contains plenty of genuine oil catnip, not imitation, and will call cats farther than any other lure. Use in connection with the above lure and you can take plenty of cats. Always use in connection with wild cat lure a large rabbit skin hung so it swings in the air. Make set nearby the skin. Cats have a poor sense of smell and to make larger catches the above is recommended.

#### HAWBAKER'S MUSKRAT LURE REGULAR NO. 1

In every test my muskrat lure proved to call several times more rats than any other lure. This lure contains real rat calling ingredients, such as Oil Carrot seed, Oil sweet flag, Oil cat-a-rin-tails root and several other natural ingredients, also rat musk and other musks. No rat will pass this lure in any season. Has actually taken rats 3 hours after traps were placed in the morning hours. Every trapper will find this the best rat lure on the market. None equals it anywhere.

#### BEAVER LURE

Made from oils of the beaver's natural food trees with castor and oil added. Also contains oils of other marsh plants, these carefully blended make this the finest beaver lure obtainable. At present prices you cannot afford to be without a bottle. No good under-ice sets, as no lure will call beaver under ice. If you are looking for really attractive beaver lure, this is it. Trappers reported the past season that it's Flat Tail Special. One trapper reports he took his limit of beaver the first night with this lure, and vowed his success to the lure. Take more beaver this season with Hawbaker's Beaver Lure.

Price Per Ounce Bottle for the Above Lures \$1.35, Post-Paid to points served by ordinary mail, Points served by Air Mail, extra charge.

#### HAWBAKER'S FOX AND COYOTE BAIT

Every fox and coyote trapper should bait up his sets at least one or two weeks before placing out traps. Use Hawbaker's Bait to get the animals used to coming to your sets. Record catches are made by preparing sets in advance. My Bait is made from 100 per cent wild animal meats. Roasted and flavored with several ingredients that will make any fox or coyote lick his chops for more. Fox will come back every dawn for a week or more with only one baiting. They will dig through 8 feet of snow to get to it. No other bait like it for sale. Price per ounce jar, 75c. Postage extra.

## Learn Fur Farming the Safe, Easy Way

### BREEDING AND REPRODUCTION IN FUR BEARING ANIMALS

The only book of its kind. Deals with all animals—foxes, mink, marten, fisher, sitch, nutria, rabbits. Covers breeding, reproduction, artificial mating, inbreeding, line breeding, establishing strains, gestation, mutations, polygamy, hormones and their use and many other subjects. 6 x 9 inches, illustrated. 186 pages, flexible cloth binding. Price postpaid \$3.50.

### PRACTICAL METHODS OF MINK BREEDING

The most complete book of its kind ever produced, being the methods of feeding, breeding, handling and general care of mink by 42 Canadian and United States ranchers. Over \$600.00 in prizes were awarded to the writers of these best letters. 150 pages illustrated, cloth bound. Every rancher who raises mink or expects to do so should have a copy. Price \$3.00.

### NUTRIA RAISING

Gives detailed methods, Canadian, German and English; possibilities of the industry; winter care, pens and water, feeding, breeding, pelting, handling and pedigrees. Nearly 160 pages, well illustrated, flexible cloth cover. Postpaid \$2.00.

### FISHER FARMING

This book is cloth bound, well illustrated and contains over 100 pages, 7x9 inches. The fisher or pekan; Fisher Fur; Breeding and Breeding Habits; Mating; Notes on the Young; Pens and Equipment; Foods and Feeding; An Ontario Fisher Farmer; Pens and Nest Boxes; Feeding and Feeding Costs; Pelt and Pelt Prices; Disposition of Pekans; Factors for Success; Sanitation. Price postpaid \$3.00.

### SUCCESSFUL MUSKRAT FARMING

Explains full methods of raising muskrats in pens, in small fenced areas and large areas. 6th edition. 7x9 inches in size, 100 illustrations and 368 pages. Bound in red keratol. Everything about muskrats. Price postpaid \$3.00.

### THE MINK BOOK

Nearly 300 pages, cloth bound, 2nd edition (1945). Covers all phases of mink raising, including a chapter of 64 pages on mutations. Detailed chapters on history, pens, feeding, breeding, pelting; nothing so complete and up-to-date has ever been produced. Completely re-written and nearly double the size of the first edition. This book will pay for itself over and over in your mink ranching operations. Price postpaid \$5.00.

### "SNAKES AND SNARING," by Raymond Thompson

The greatest book on snaring ever written, by the world's greatest authority. This

book contains a world of information, telling how to make your own snares including many different types of snares, as well as deadfalls and box traps for all animals. It tells how to use them successfully to get results. Over 100 pages, hard cover, this book is well and plainly illustrated, so that even the novice can understand it. Price postpaid \$2.50.

#### CANADIAN WILDERNESS TRAPPING, by Joe Martin

A fine new treatise on effective methods of trapping of all animals, snaring, scouts life and travel in the wilderness. Written by a western professional trapper of many years' experience. Some of these methods have sold for as high as \$10.00 each. Offered now for the first time in book form. Price \$1.00.

#### RAISING FUR RABBITS by R. G. Hodgson

Second edition, 1944. Covers all phases of rabbit raising in Canada and the commercial industry in California. The most complete book yet published. Covers all fur breeds in breeding, feeding, housing, killing, grading, marketing, tanning and diseases. Well illustrated, cloth bound, 140 large pages. Price \$3.00.

#### ANGORAS FOR PROFIT

Covers all phases of the industry—History, Startling, Number of Animals to start with, Pens, Feeding, Breeding, methods both of plucking and clipping, including ideas on plucking from the French industry. Price \$2.00.

#### PEDIGREE FORMS

Each book contains four generation pedigrees, enough for 60 animals to give to your customers, and a duplicate sheet and carbon, making a complete record of the sale, pedigree and all other data. Each pedigree sheet on 20 lb. blue bond, illustrated with cuts of animals. Size 9x12 inches. Bound in heavy cardboard. Price postpaid \$1.10.

#### C.S.R.A. RECORD BOOK

A complete Stud, Breeding, Show, Wool and Pelt Record, as well as day by day expenditures and income and totals for the year. 64 pages, 2 colors, 8 1/2 by 12 1/4 inches, bound in heavy cover. Rabbit, mink and other small breeders with a hundred or so animals will find this book ideal for record purposes. Price postpaid \$1.00.

Send Your Order to the Submarine Trap Co., Fort Saskatchewan, Alberta, Canada

## Are You Interested in Fur?

Fur Trade Journal of Canada was established in 1922 to serve the needs of fur farmers, trappers and all those interested in furs. Its editor, Robert G. Hodgson,

spent many years as a hunter and trapper; later as a fur farmer and was editor of the Trapping and Fur Farming Departments of many publications including Family Herald and Weekly Star, Free Press, Prairie Farmer, Grain Growers' Guide, Farmers Advocate and others. As an editor experienced in the field he knows what trappers, hunters and fur farmers like.

Each issue is crammed with articles on raising mink, foxes, beaver and other animals; Raymond Thompson looks after the trapping department. There is also a Rabbit Section dealing with fur and wool rabbit raising.

The fur market news (the most extensive of any Canadian publication) is alone worth the subscription price to fur farmers, hunters, trappers and others with furs to sell.

Each issue contains from 60 to 124 pages beautifully illustrated; cover two colors.

Subscription price \$2.00 yearly in Canada or \$5.00 for three years. In the United States, \$2.00 yearly or \$5.00 for three years. Extra postage charge will be made for points served by air mail.

Subscribe to this wonderful publication through the Submarine Trap Company and keep posted on all matters relating to furs.

# The Hunting or Rattering Canoe

One of these canoes will pay for itself in one day on a trap line due to the extra pelts taken by the trapper.

A canoe designed and built for the trapper or hunter. Weighing approximately 23 pounds and can be carried with ease, carried on top or on the running board of a car, or lashed to the floats of an aeroplane.

This type of canoe has been used by trappers, Indians and Eskimos in Canada's far northland for many years. It will hold two men or one man and his hunting or trapping equipment.

These canoes are built of heavy canvas, reinforced with strong native wood, processed to last for a number of years, under ordinary conditions.

Canoe specifications, 12 feet long, 30 inches wide and 12 inches deep, weight approximately 23 pounds.

deliveries until about the first of May, 1948. Orders will be filled as received. Order early to avoid disappointment. The price of the Hunting Canoe F.O.B. Port Saskatchewan, \$38.00.

For duck hunters they are unsurpassed. The hunter can retrieve birds that otherwise would be lost in the water.

It is an ideal canoe for the fisherman. Many places can be reached with one of these canoes, which help make a fishing trip a success rather than a failure.

These canoes are painted with two coats of gray marine paint and trimmed with black.

Due to the shortage of materials we cannot make

## Skiff or Row Boat

Skiffs are used in Canada's North Country where they have to stand up to hard usage and abuse of trappers, prospectors, fishermen and police patrols.

These boats are designed for cars or outboard motors and will withstand the rugged work demanded for fishing, hunting or summer resort camps, no danger from jagged rocks or snag punching holes in them. They will last for many years.

The skiff is 20 feet long, 4 1/2 feet wide and 2 feet deep and is made of 1 inch seasoned wood, treated for decay by special processing. It

The ideal boat for fishing, hunting or at a summer resort.

is painted with two coats of Marine Grey and trimmed with black. Weighs approximately 260 pounds.

They are very light running due to the design, and are by no means easy to capsize. If you require a boat that will last, these will please the average fisherman, prospector, hunter or out-door camper.

Prices on these skiffs F.O.B. Port Saskatchewan, less cars, \$64.00.

Due to shortage of materials we cannot make delivery until the first of May, 1948. Orders will be filled as received. Order early to avoid disappointment.

These skiffs can be purchased in a ready cut knocked down manner, every board being numbered and full plans for setting up being sent with each order. This saves greatly on freight rates to far outside points in our north country, where transportation rates are very high. The plans for erecting is so simple that any handy man with a hammer can set one up in a few hours, all boards and materials being cut to exact measurements. Paint and nails for erecting, are sent with each skiff.

Price of skiffs knocked down, baled ready for shipment, \$40.00.  
F.O.B. Port Saskatchewan

Cars, 7 to 7½ feet long, to fit the above skiff \$12.00 per pair, complete with our locks.

## The Cascade Canoe

For the sportsman or camper requiring a sturdy canvas canoe, we recommend the Cascade Canoe. It is 16 feet long, 35 inches wide, 12 inches deep, weighs 60 pounds and has a capacity of 1,400 pounds. It is finished with two coats of green marine enamel and made from good quality ash and cedar material. Price \$110.00, freight prepaid to points served by railway.

Canoe paddles are made of seasoned maple wood for the above canoe @ \$3.00 each.

## Skeeter Bombs

REPELS ALL ANNOYING INSECTS

It's here, at last—the formula that repels MOSQUITOES, BLACK FLIES and all annoying insects. You apply contents of one Skeeter Bomb to face, arms, legs. Guaranteed FULL protection or money back. Get 12 Skeeter Bombs in vest pocket plastic package or, for convenience carry one or two in your pocket. *67¢ package*

WARTIME JUNGLE FORMULA NOW MADE AVAILABLE TO YOU *and 3¢ mid*

1. Pleasant to use. 2. Safe for the skin. 3. Proved effective and used by the armed forces in tropics. 4. Convenient—comes in capsules, easy to carry, can't spill.

## Adjustable Belt Stretchers

Notice the evenness of the pelts when stretched on one of our adjustable pelt stretchers.

Get higher prices for your fur by using the proper type of stretchers. Thousands of dollars are lost by trappers each year by poor stretching. Our stretchers are all strongly made of good seasoned spruce and will last for years if care is taken in storing them after the trapping season. These stretchers are designed so that they can be adjusted for small, medium, large and extra large animals on the one stretcher. Air ventilation through the centre of your stretcher enables pelts to dry more quickly. This is exceedingly valuable to drowned mink and muskrats.

When stretching, pull the pelt down on the stretcher and tack at both sides, then open the stretcher to fit the hide and tack down the other two ends, your pelt is then ready for the tanning. One of these stretchers will pay for itself in the stretching of one pelt.

Prices quoted are delivered by express, postage or freight to points in Canada served by railroad and ordinary mail. Points served by air-express and air mail, extra delivery charges. Muskrat Stretcher, 40c each, postpaid. One dozen or more, \$4.00 per dozen, express prepaid. Mink Stretcher, 50c each, postpaid, six or more 40c each express prepaid. Skunk and Raccoon Stretcher, 60c each, postpaid, six or more, 50c each, express prepaid. Fox Stretchers, 80c each, express postpaid, six or more, 70c each, express prepaid.

We also manufacture a combination Stretcher for large Skunks, Raccoon, Coyote, large Fox and Brush Wolves. Stretcher, \$2.00 each, express, prepaid. Six or more, \$1.75 each freight, prepaid.

## Raw Furs for Rugs, Mats etc.

We specialize in obtaining the finest Polar Bear, Black and Brown Bear, Barren Land Grizzly Bear, Red, Cross, Silver and White Fox, Black and Grey Wolves, Wolverine, Coyote, Brush Wolves, Cougar and Mountain Lion Hides in the raw state which we will have made up to your own specifications in rugs and mats. We will also arrange for the making of fur neck pieces.

Write for prices, giving full particulars on your requirements.

### PACK SACKS

Made from 12 oz. khaki duck, complete with shoulder straps of best quality leather, strongly reinforced at all points of strain. Size, 18 in. x 24 in. x 6 in. Price delivered \$7.00.

### DOG SHOES

Save your dogs feet from injury on sharp ice. Heavy duck canvas shoes, Price, 10c each. Postpaid ordinary mail.

## Sleep Outdoors in Comfort!

This style Wall Tent is the most popular camping tent on the market. Guy ropes are placed at each seam; all seams are double sewn, reinforced where the strain is greatest; full size storm flaps.

8 oz. 8 ft. x 10 ft. x 3 ft. wall @ \$24.75

10 oz. 8 ft. x 10 ft. x 3 ft. wall @ \$24.75

10 oz. 10 ft. x 12 ft. x 4 ft. wall @ \$33.75

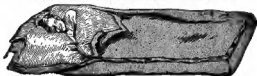

8 oz. 8 ft. x 10 ft. x 4 ft. wall @ \$28.75

10 oz. 10 ft. x 12 ft. x 4 ft. wall @ \$31.75

10 oz. 12 ft. x 14 ft. x 4 ft. wall @ \$43.75

Express prepaid by railway only.

## The Klondike Sleeping Robe

The Ideal Eiderdown Sleeping Robe, soft, warm and the height of comfort —the choice of prospectors, surveyors, explorers and engineers.

Designed especially for outdoor sleeping requirements, in all temperatures. The selected down which is incorporated affords the sleeper real rest and comfort.

Pure wool Kansey forms the inner lining of the "Klondike" Eiderdown, the outer covering being olive drab shelter duck waterproofed. Shelter duck is far superior to other coverings owing to its fine weave, and in conjunction with the waterproofing process makes it unsurpassable for outdoor service.

Each "KLONDIKE" EIDERDOWN is fitted with dot fasteners for convenience, also a hood for protecting the head and neck. They are light in weight, being very easily carried. Each Eiderdown is packed in a suitable Duffle Bag for carrying purposes. The 36-in. by 90-in. Klondike Sleeping Robe weight 15½ pounds and costs \$37.00. The 78-in. by 84-in. robe weights 13 pounds and costs \$40.00.

We also can supply you with Kansey Sleeping Robes (with pillows) @ \$23.00 and Summer weight Wool Batt Sleeping Robes @ \$12.00.

The above prices include delivery charges to points served by railroad.

### MOSQUITO BARS

Single Mosquito Bar, each ..... \$1.75;

Double Mosquito Bars, each ..... \$4.25

Prices are postpaid to points served by ordinary mail.

### TRU-SPOT FLASHLIGHT

Clear lens with side glow feature. Two-way slide switch. Chromium plated steel case. Price postpaid \$1.88.

### LARGE HUNTING KNIFE

Polished blade attached to leather handle. Very strongly riveted. Best quality carbon steel. Regular \$6.40 knives. White stock lasts. Price postpaid \$4.00.

### LADIES' WRIST WATCH

Ladies' LeRoy 16J Wrist Watch in 16K Gold. Guaranteed Swiss movement. Stainless steel back. Price \$21.00, Tax \$5.25, Total price postpaid \$26.25.
